

Errin E Johnson

Full Stack Developer JS

Professional Summary

Looking for a career in software development; a company that promotes and executes a healthy workplace environment.

A true team player offering 4 years of experience in the software industry through volunteer work with school projects and local communities. I have been an enthusiastic technical professional with a complete understanding of entire software development life cycle.

I am trained in database normalization , researched, and learned VB Code to perform complex tasks; and known for having talents in database projects . Very interesting in Blockchain development.

Work History

KCTCS – lab Supervisor CIT 105 contract work Spring 2021 Cohort

- Set up for remote instruction for instructor
- Answered and or guided students' questions
- One on One tutoring
